Accident at the construction site of the Shuakhevi Project

Friday, April 17th at approx. 18.30 Georgian time an accident occurred at the construction site of the 187 MW Shuakhevi project in Adjara in Georgia.

Three employees of AGE Batum, the civil works contractor for the Shuakhevi project, were involved in an accident while building a bridge in Didachara. Two of the workers, one from Turkey and one from Georgia, perished in the accident. The third person, from Georgia, was badly injured and transported to Batumi for treatment.

Clean Energy Invest is deeply affected by the accident and our thoughts are with affected families says CEO of Clean Energy Invest Brandtzaeg.

The company has initiated an investigation to clarify what caused the accident.
